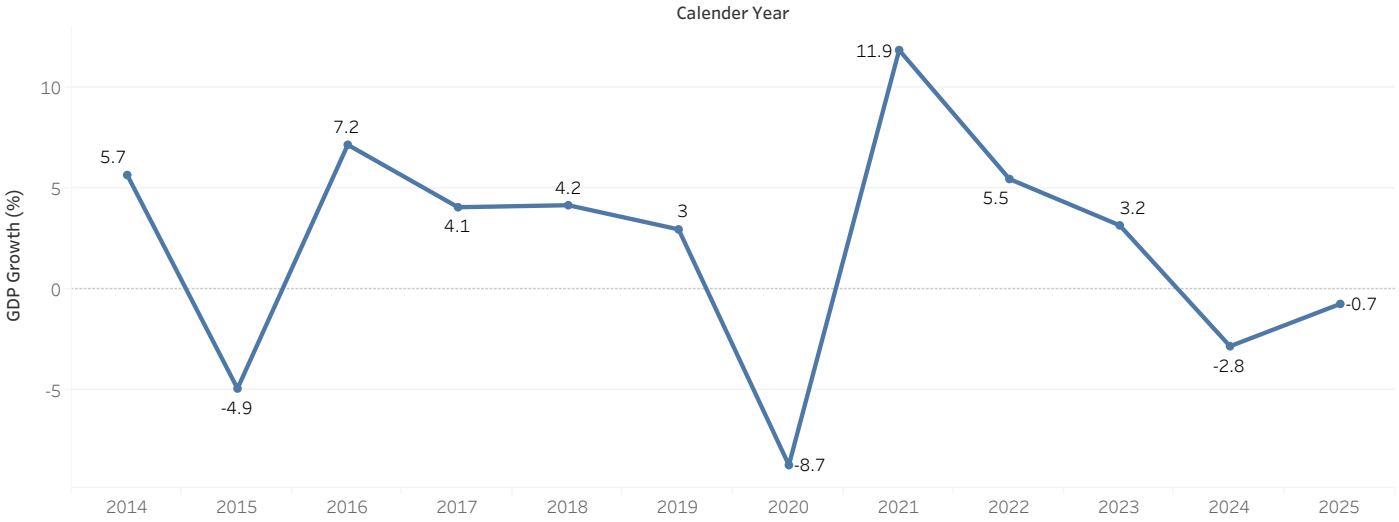
BOTSWANA'S ECONOMIC PERFORMANCE

GDP Growth Analysis | 2014-2025

Average GDP	Highest GDP Growth	Lowest GDP Growth
2.3	11.9	-8.7

Botswana's GDP Growth Performance (2014-2025)



ECONOMIC INTERPRETATION

Botswana's GDP growth experienced considerable fluctuations between 2014 and 2025. The economy recorded its lowest growth in 2020 at -8.7%, followed by a strong recovery in 2021, when growth reached 11.9%. However, economic performance weakened again, with negative growth recorded in 2024 and 2025. These fluctuations highlight the volatility of Botswana's economic performance.
