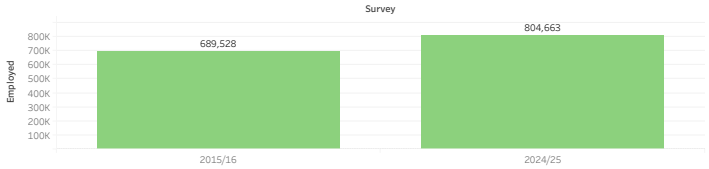
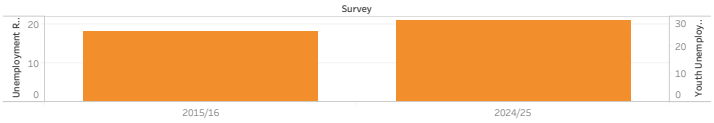
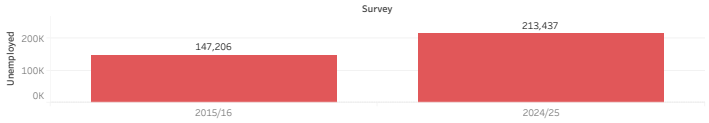
Employment Population Comparison



Youth vs Overall Unemployment



Unemployment Comparison



Botswana's labor market experienced changes between the 2015/16 and 2024/25 survey periods. The labor force increased from 836,734 to 1,018,099 people, while the employed population increased from 689,528 to 804,663. However, the unemployed population also increased from 147,206 to 213,437. The overall unemployment rate rose from 17.6% to 21.0%, while youth unemployment increased from 25.1% to 28.9%. These findings suggest that employment growth has not been sufficient to absorb the growing labor force. Youth unemployment remains a particularly important policy challenge.
